Grant helps explore alternative energy farming

WOOSTER — A $20,000 grant was awarded to the Ohio Agricultural Research and Development Center, which will allow researchers to begin assessing the potential for farms in Northeast Ohio to shift from more commodity agriculture to more specialty, value-added agriculture.

Fund OKs third phase

By BOBBY WARREN

The Fund for Our Economic Future, a dedicated endowment for Wayne County, has approved the disbursement of funds for the third phase of its program, which is focused on alternative energy farming.

The Fund's efforts are aimed at improving the local economy and creating sustainable, long-term growth. The third phase will provide funding for projects that will support the development of alternative energy sources, such as solar, wind, and biomass.

The Fund's members have been working to improve the economic climate in Wayne County and are committed to helping local farmers transition to more sustainable forms of agriculture.

The Fund's endowment has been a key part of its success, with contributions from local businesses and individuals. This phase of the Fund's program is expected to have a significant impact on the local economy and environment.
